LEZIONE LAGRANGIANA
Prof. René Schilling

TU Dresden

On Liouville's Theorem

25 Maggio 2023 alle 15.00
in Aula A di Palazzo Campana
Via Carlo Alberto 10, Torino

ABSTRACT: The classical Liouville Theorem says that bounded analytic and bounded harmonic functions are constant. We are going to discuss results of this kind, for bounded as well as for growing functions, for a class of non-local operators that includes, for example, the generators of Lévy processes.
